COWI

Helsingborg + Helsingør Community

- Transnational Regional Community
- Reductions in energy demand side
 - Public buildings incl.
 - Campaigns
 - Training
- ECO-rehab of up to 453 dwellings
- 282-350 new ECO-dwelling on 3-5 sites
- Utilisation of biomass
- Electricity from wind power
- Combi cooling (poly-generation)
- Organic waste for biogas (optional).

COWI

Task 2.1.1; 3.1.6 ECO-Buildings in Helsingborg

- **Task leader:** Helsingborgshem, Collaborator: COWI
- **Approach:**
 - **Sites Identified: To be finally approved by EC**
 - **COWI: BE06 and BSIM calculations, dialogue with architects and HOUSE-SE**
 - HOUSE-SE: Provide design basis and project material, set demands to designers
 - COWI: Economic evaluation
- **Deliverables:**
 - D.2.1.1.1 Analysis report of energy concepts for target sites integrating both RES and RUE incl. recommendations. Month 9 (COWI)
 - D.3.1.6.1 Tender documents that can identify eligible cost (HOUSE-SE)

7

COWI

Sites in focus for ECO-Buildings for Helsingborgshem in Helsingborg

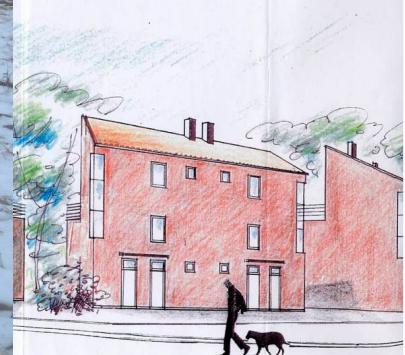

- **Maria Park**, 68 dwellings 2-3 level, new row houses
- **Turkiet**, 107 dwellings up to 5-7 level, new townhouses
- **Fronten**, 48 dwellings in up to 13 level, new apartment block
- **Park Kvarteret**, 111 dwellings in 7 levels, rehab. townhouses, Drottninghög & a.o. up to 340 dwellings for rehab
- Status: **In progress**

ECO-rehab of Municipal Buildings

Top: Dwellings at Helsingborg Mun.,

Bottom: Schools at Helsingør Mun.

Task 3.1.4; 4.1.2

Energy Man. Municipal Buildings in Helsingør

- **Task leader:** Helsingør Kommune Sten G. Poulsen, Collaborator: COWI
- **Approach:**
 - MUN-DK: Identify buildings for action together with COWI, justify costs for support
 - COWI: Prepare energy audits and input to action plan.
- **Deliverables:**
 - D.3.1.3.1 Energy Audit reports Month 8 (COWI)
 - D.3.1.4.1 Prioritised action plan (Schools) Month 12 (MUN-DK)
 - Tender documents that can identify eligible costs (MUN-DK)
 - D.4.1.2.2 Monitoring system on Municipal buildings Month 14 (MUN-DK)
 - D.3.1.5.1 Rational Use of Energy Manual Month 18 (COWI)

Approach for ECO-Buildings

1. Mapping data, initial screening, analysis of possibilities, energy targets, action plan

2. Implementation e.g.:

- Energy efficient lighting, light control and BMS
- Demand controlled ventilation with heat recovery
- 1+2 pane windows
- Extra insulation, reduced line losses
- Solar heating, heat-pumps
- De-central gas boilers vs. local district heating

3. Monitoring and follow-up

- Sharing savings between end-users and municipality at schools, offices and institutions
- Training and information to janitors and caretakers

COWI

Task 2.1.1 & 3.1.1 2 MW Wind turbine pilot in Helsingborg

- **Task leader:** Öresundskraft, Collaborator: COWI
- **Approach:**
 - UTIL-SE Analyse wind turbine integration. Plan environmental permit etc.. Prepare tender documents. Plan monitoring programme.
 - COWI assist in approval procedure and tender spec.

- **Deliverables:**

D.2.1.1.2 Background paper on wind turbine integration Month 12

In progress

D.2.1.3.1 Working paper on interaction in the Helsingborg context Month 14

D.3.1.1.1 Tender for bidding of Wind Turbines Month 18

16
09.05.06

Reto M. Hummelshøj

COWI

Permit Procedure Wind Turbines

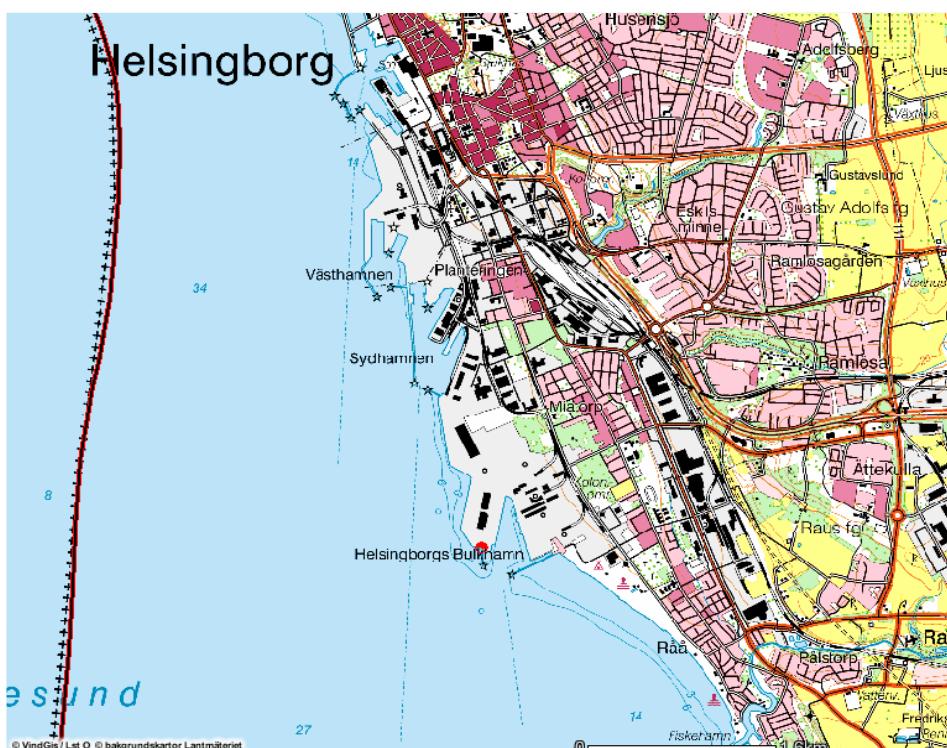

- **Site Owner**
- **Environmental Authorities**
 - County
 - 12 months
 - Appeal 12 months
- **Building Authorities incl building permit**
 - Municipality
 - 9-12 months
 - Appeal 2-3 years
- **Other stakeholders**
 - Army
 - Airtrafic Authority
 - Neighbours etc.

17
09.05.06

Reto M. Hummelshøj

COWI

Best Site for one 2 MW Turbine as a ECO-City landmark

Appeal Procedure

- Permits 9-12 months
- Appeal 2-3 years

3. Stormgatan
4. NSR

COWI

Task 2.1.2; 2.1.3 Polygeneration - heat driven cooling and heat pump

- **Task leader:** Lund University / Öresundskraft,
Collaborator: COWI (incl. Kurt Madsen, Niels Henrik Harboe)

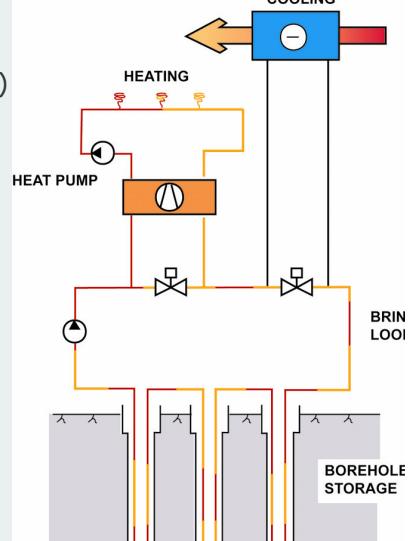

- **Approach:**

- UNI-SE: Model heat reservoir
- UTIL-SE: Find potential location for demo and analyse interaction with overall energy system in Helsingborg
- COWI: Develop cooling combi concepts, analysis and economic optimisation together with UTIL-SE

Status: Mapping of hydrogeological conditions and investigation of possible sites is ongoing

- **Deliverables:**

- D.2.1.2.1 Analysis report as basis for demo-project Month12 (UNI-SE)
- D.2.1.3.1 Working paper on interaction in the CHP system Month 14 (UTIL-SE)
- D.2.1.3.2 Working paper on possibilities in Helsingør. Month 18 (COWI)

20 | Reto M. Hummelshøj
09.05.06

COWI

Task 3.1.2; 4.1.2 5 MW Bioboiler at Helsingør

- **Task leader:** Helsingør Fjernvarmeforsyning, Collaborator: COWI
- **Approach:**
 - **Preliminary design (done)**
 - Detailed design and tender (incl. options on energy eff. & fuel flexibility)
 - Tender evaluation, Contracting, Construction, Start-up, Monitoring
 - **Permit Given ...but waiting for decision on complain from the Energy Appeal Council**
- **Deliverables:**
 - D.3.1.2.1 Tender documents for competitive bidding Month ? (COWI)
 - D.4.1.2.1 Plan of monitoring system Month 18 (UTIL-DK)

21 | 09.05.06

Reto M. Hummelshøj

COWI

ECO-Renovation of Boiler House with new 5 MW High Efficient Biomass Boiler

22 | 09.05.06

Expansion of Biogas Plant being planned at NSR incl. upgrade to natural gas standard

23
09.05.06

Reto M. Hummelshøj

COWI

Task 2.1.5; Biogas in Helsingborg

- **Task leader:** NSR, Collaborator: COWI
- **Deliverables:**
**D.2.1.5.1 Description of biogas plant design concept Month 8
(ENV-SE)**
In progress

24
09.05.06

Reto M. Hummelshøj

COWI

Materials recycling and bioclimatic building design at NSR

25
09.05.06

Reto M. Hummelshøj

COWI

Task 2.4.1; Comfort Metering and Control in Helsingborg

- **Task leader:** Helsingborgshem, Collaborator: COWI
- **Approach:**
 - **COWI: dev. and recommend on control strategies, and features together with Helsingborgshem**
 - **HOUSE-SE: involve BMS specialist to produce prototype. Comfort, heat, water, power, peak reduction and ventilation control, (subcontract 25000 euro). Identify demo site.**
 - **Communicate with RTD-NO and UTIL-SE and UTIL-SP on communication part**
- **Deliverables:**

D.2.1.4.1 Description of improved metering and control system Month 10 (HOUSE-SE)

26
09.05.06

Reto M. Hummelshøj

COWI

Task 5.1.1; 6.1.1 Training, Dissemination and Campaigns

- **Task leader:** Öresundskraft, Collaborator: COWI; Helsingborg Stad; Helsingør Kommune
- **Approach:**
 - UTIL-SE Assess training needs and prepare note to TRAIN-SP, Carry out cross community workshop
 - UTIL-SE Prepare caretaker training program together with COWI etc.
- **Deliverables:**

D.6.1.1.2 Local community dissemination plan Month >5 (MUN-SE)

D.6.1.1.1 Present project in Energitacentrum exhibition Month 10 (UTIL-SE)

D.5.1.1.1 Caretaker program Month 12 (UTIL-SE)

D.5.1.2.1 First 20 caretakers trained Month 18 (UTIL-SE)

D.6.1.1.1 Campaign on energy eff, appliances Month 12 (UTIL-SE)

D.6.0.2.1 EU Dissemination plan Month 12 (COWI)

Cross community workshop (UTIL-SE)
