

### BEST: H+H 5 Refurbished institution

# The Cultural Yard, Helsingør

#### **Project information**

Project type: ECO-rehabilitation Address: Allegade 2, Helsingør

Harbour 2010

End construction year:

Building type:

Old ship building yard

refurbished into cultural

institution

Storeys:

Persons in building:

13,000 m<sup>2</sup> Gross area BTA: Total eligible costs: € 559,000 Total costs:

3-4

€ 2,925,000

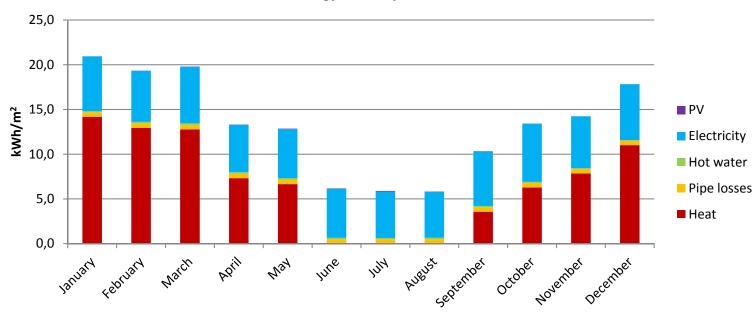

#### Special ECO-technologies applied:

- Reuse of existing building
- Low energy lighting and LED lighting on shelfs in library and daylight utilisation
- PV plant installed
- PIR sensors in 95% of all rooms
- Optimization of windows and glass façade
- Climatic buffer zone in arcade
- External solar shading
- Thermo active constructions
- Natural ventilation
- Reduction of standby consumption
- Installation of sub meters
- Low energy pumps with A-label
- Ground water cooling
- "Cradle-2-Cradle" floor in untreated Danish oakwood

### **Energy consumption**

## BEST: H+H 5 Refurbished institution

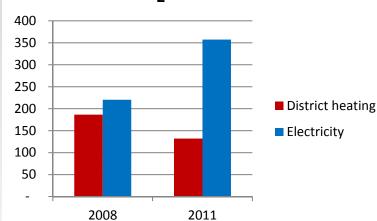

## Kulturværftet, Helsingør

#### **Lessons learned:**

- It is important also to calculate embodied energy in the overall balance of refurbishment of buildings
- The CO<sub>2</sub> emission is unknown during the years of rehabilitation (2009-2010). The emission is higher after the rehabilitation as the building is 4739 m<sup>2</sup> larger.

## CO<sub>2</sub> emission

 Monitoring data includes all electricity (lighting, ventilation, cooling, it, kitchen and theatre)
